

DIY House Tie Necklace

The things you'll need are:

Acrylic paint in the 2 colors of your house

Small paintbrushes

A necklace

The tie template

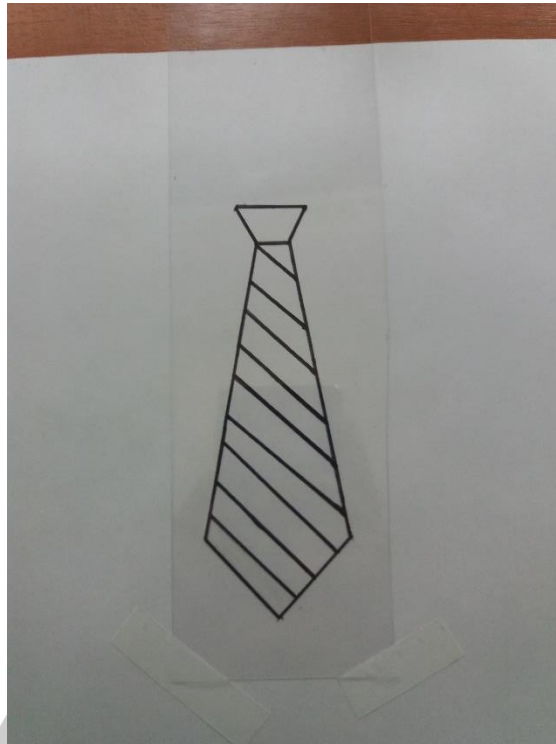

clear shrink plastic

a jump ring

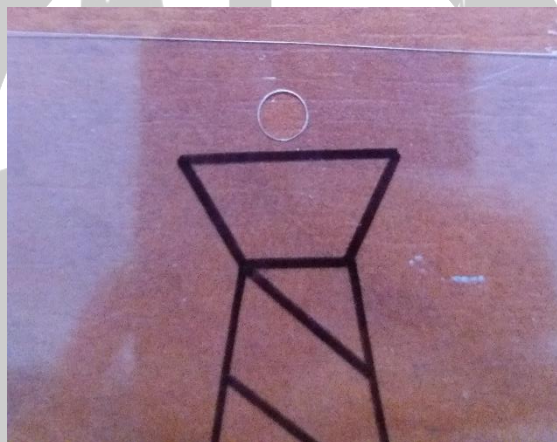

a black permanent marker

a hole puncher

Grab a piece of your clear shrink plastic and the tie template and trace the tie with the permanent marker onto the plastic.

Take your hole puncher and punch out a hole at the top of the tie.

Cut the tie out.

Follow the instructions on your shrink plastic to let it shrink.

To make sure the tie is flat place a heavy book on top of the tie right after you've taken it out of the oven.

After it's cooled down, you can start painting.

Take your time and the best is to add thin layers at a time.

This step is optional but to secure the paint from scratching of while you use it as a necklace add a layer of some type of sealer on top of the paint (for example modpodge).

Add your jump ring and necklace.

And now your tie necklace is done!

Have fun making this necklace !!
