

# DIY House Tie Pin

The things you'll need are:

Acrylic paint in the colors of your house

Small paintbrushes

A pin back

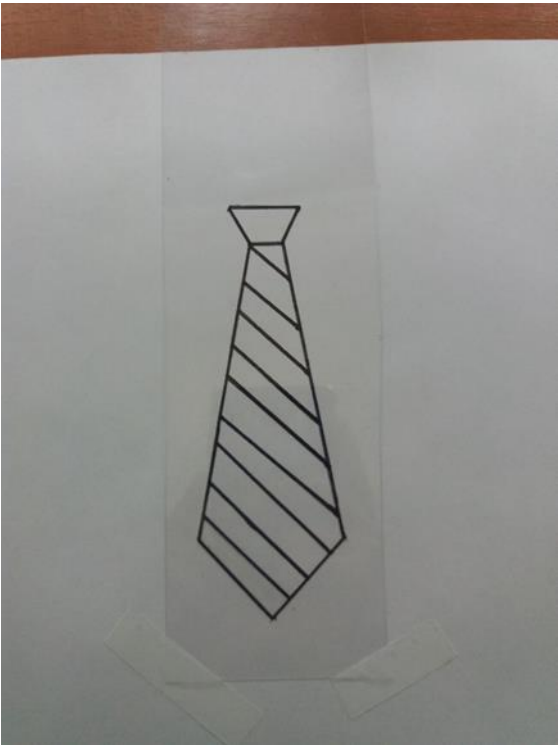

The tie template

clear shrink plastic

a black permanent marker

hot glue gun

Grab a piece of your clear shrink plastic and the tie template and trace the tie with the permanent marker onto the plastic.

Cut it out and follow the instructions on your shrink plastic to let it shrink.

After it's cooled down you can start painting the tie.

Take your time and the best is to add thin layers at a time.

This step is optional but to secure the paint from scratching of while you use it as a pin add a layer of some type of sealer on top of the paint ( for example modpodge).

Heat up your hot glue gun and add your pin back to your tie.

And now your tie pin is done!

Have fun making this pin !!
