

Felt Ornaments

the things you'll need are:

The templates

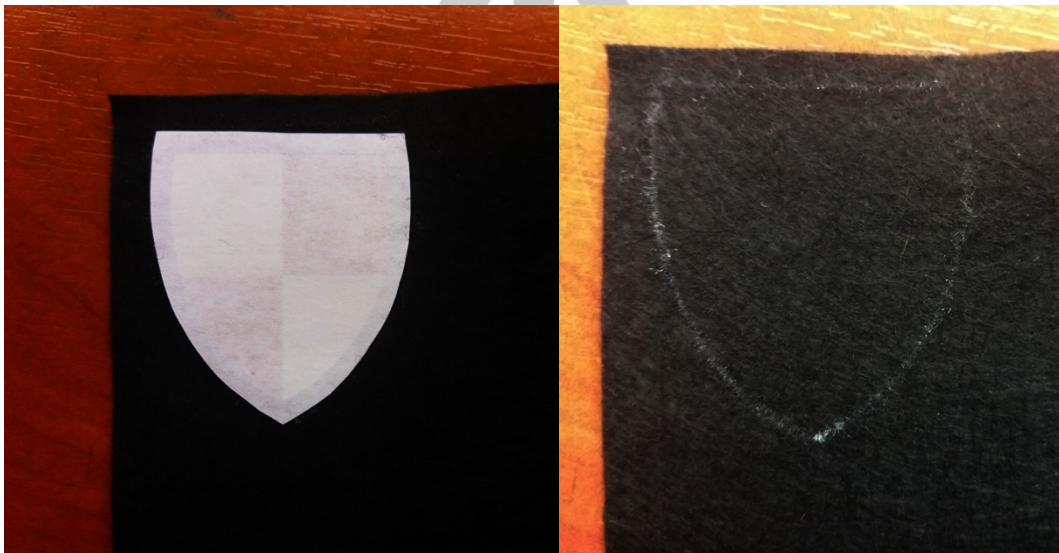

fabric glue

Felt
A black pen/marker/fine liner
A white pen or pencil

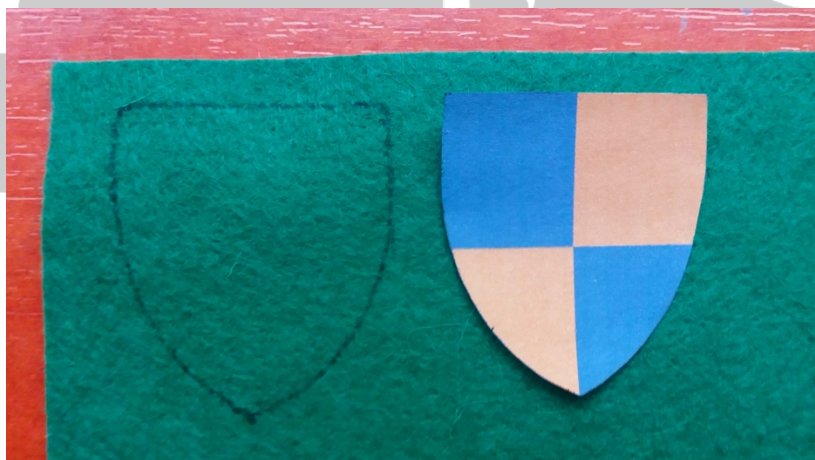

scissors
string
black paint and a small paintbrush

the specific colors of felt you'll need to make all of the ornament are:
shields: black, red, yellow, green, grey, blue and brown.
ties: red, yellow, black, green, grey, blue and brown.
broomstick: skin color/light brown, dark brown and yellow.
golden snitch: white and yellow.
jumper: your 2 favorite colors or your 2 house colors.

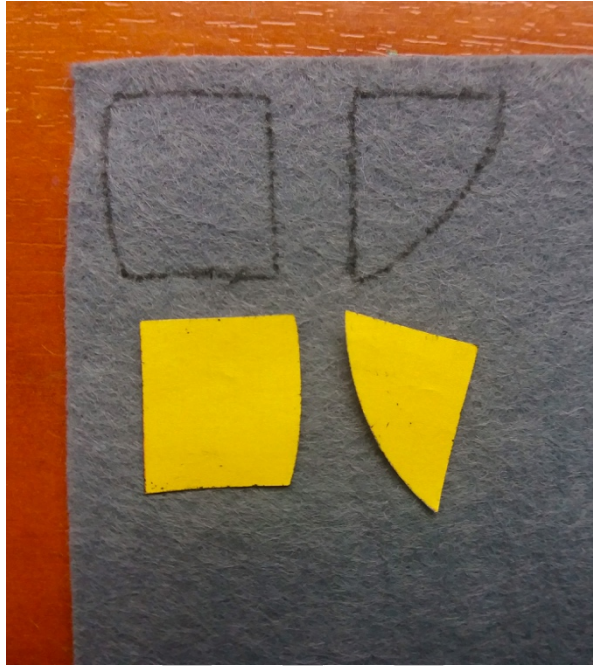

you can find the font I used for the letter for on the jumper on the page.

cut out one of the shields and lay it down with the colored side down onto some black felt and trace around it with your white pen/pencil.

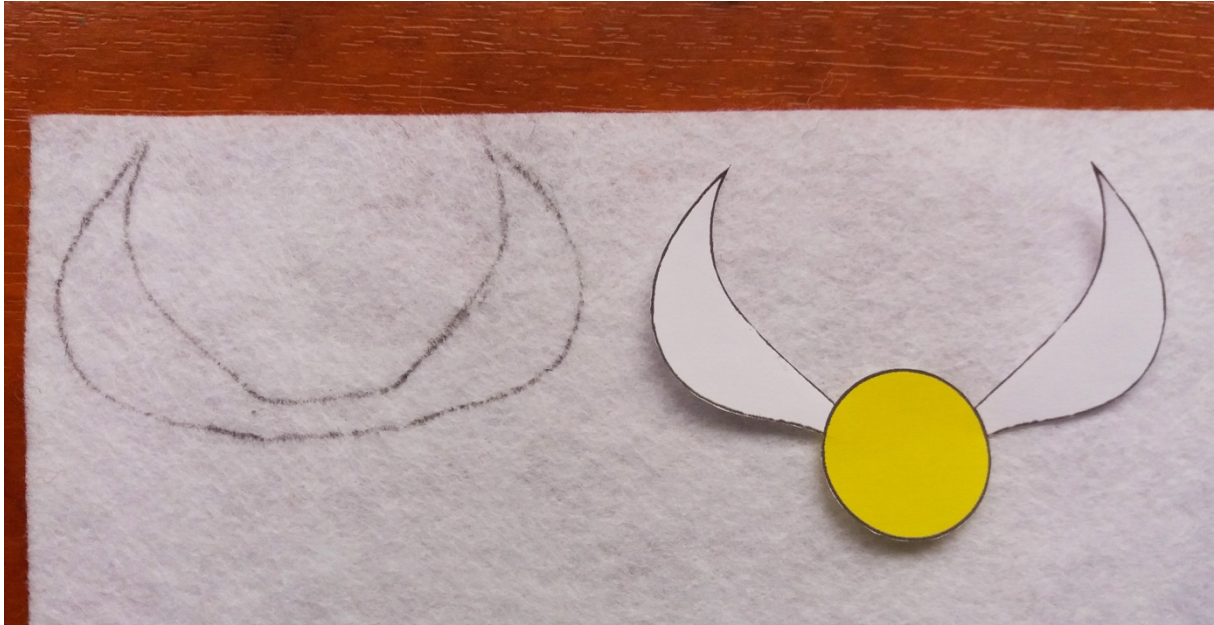

cut another shield but this time only the house colored piece and place it with the colored side down onto the felt and trace it over on the green, red, yellow and blue felt with your black pen/marker/finer liner.

cut out another shield but this time you'll only need the secondary house colored parts (yellow, grey, black and brown) and place it with the colored side down onto the felt and trace it over on the yellow, grey, black and brown felt with your black pen/marker/finer liner.

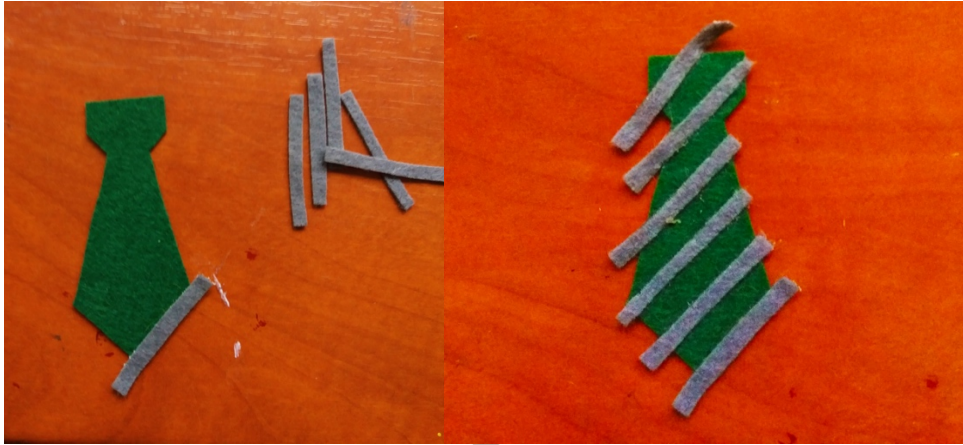

cut out all of the parts and if you turn the piece around you'll see that the pen lines are on the back of each piece and you have some clean looking pieces. glue all of the pieces together and your shields are done!

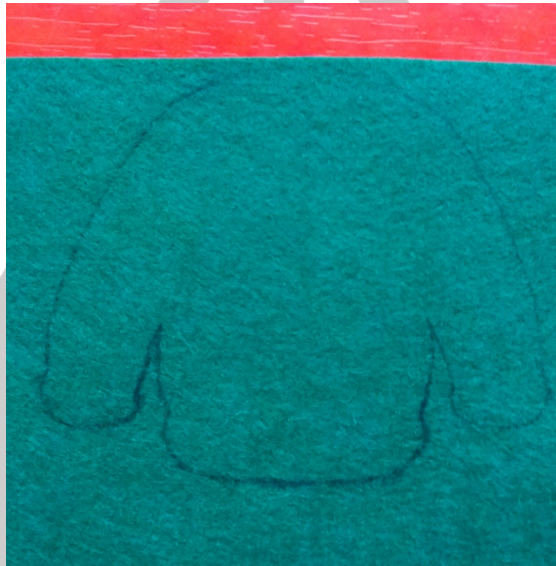

cut out your golden snitch and place it inked colored side down onto your white felt and trace over the wings with your black pen/marker/ fine liner and don't forget to connect the wing with each other.

cut out the little yellow circle from the wings and trace it onto your yellow felt. cut the wings and the yellow circle and glue them together. I put some glue on the back of the golden snitch and glued it down onto some white felt to make the wings stronger. and your golden snitch is done!

cut out one of the ties and place it colored side down onto your green felt and trace it over with your black pen/marker/fine liner. then cut a few strips (I did 6) of grey felt (eyeball the size) and glue them onto your tie. when the glue is dry cut off the excess parts of the stripes that go past the tie. repeat these steps with the other 3 ties and your house ties are done!

cut out the jumper and place it colored side down onto your chosen felt color and trace it over with your black pen/marker/fine liner.

carefully cut out your letter and place it colored side down onto your second chosen color of felt and trace it over. cut out the jumper and carefully cut out your letter. glue don the letter in the middle of your jumper. take your black paint and paint brush and add the details on the jumper (use the template as reference). let the paint and your jumper is done!

cut out the butterbeer and place it colored side down onto some grey felt and trace it over using your black pen/marker/fine liner.

cut from the butter beer the yellow part and place it colored side down onto some yellow felt and trace it over.

now take the 'foam' part of the butter beer and place it colored side don onto some white felt and trace it over.

cut everything out and glue everything down in its respected place and then your butter beer is done.

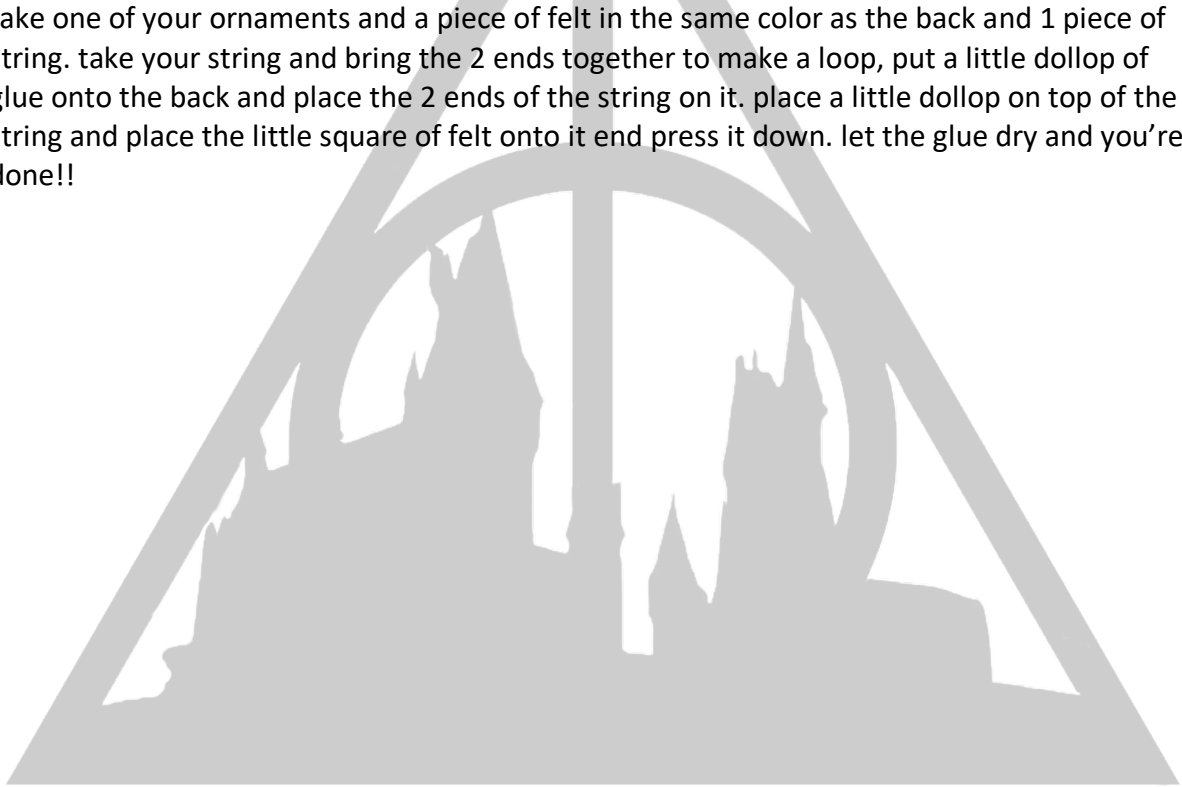

cut out the broomstick and place it colored side down onto some skin colored/light brown felt and trace it over. cut of the 'broom' part and place it colored side down onto your dark brown felt and trace it over. take some yellow felt and cut 2 thin strips and 1 slightly thicker one. cut everything out and glue them together. just like I did with the snitch I glued the whole broomstick down onto the same color I used for the stick make it stronger. and now your broomstick is done.

take your string and cut 11 pieces of string (each 6cm long).

take one of your ornaments and a piece of felt in the same color as the back and 1 piece of string. take your string and bring the 2 ends together to make a loop, put a little dollop of glue onto the back and place the 2 ends of the string on it. place a little dollop on top of the string and place the little square of felt onto it end press it down. let the glue dry and you're done!!

and now your felt ornaments are done!!
I hope you have fun making these ornaments!!!
