

Flying Keys

The things you'll need are:

White organza bags

Metal keys

Wings template

Scissors

A small tip permanent marker

Double sided tape or glue

Invisible thread

Take one of your organza bags and take all of the threads and sting out of it. Place the bag on your template and trace it over onto the bag with your permanent marker. Out of 1 bag you can get 2 big wings and 3 smaller wings.

Cut the wings out and put a small piece of double sided tape or a little bit of glue in the middle of the wings.

Grab your key and place the wings on the underside of the key and fold the wings around the key.

Repeat all of the steps until all your keys have a set of wings.

Next take 2 pieces of thread and tie them to the key as shown on the picture above.

Then tie the other end of each thread to a pushpin.

The higher you tie the pushpin the lower the flying key will hang from the ceiling.

The closer you tie the pushpin to the key the flying key will hang closer to the ceiling.

Last hang your flying keys onto the ceiling.

And now your flying keys are done!
Hope you have fun making these!!
