

Hedwig

This DIY is super fun to make and it is a great room decoration.

DIY - Harry Potter

The supplies you'll need are:

Acrylic paint (black, white, yellow and orange)

a sponge

Paint brushes

an owl (mine was a hold hand cream container)

Water

masking tape (optional)

Something to put your paint on

DIY - Harry Potter

First you want to look up a picture of Hedwig as a reference.

Then add your first layer of white paint with the sponge. Dab with the sponge it will work better than with a brush.

Let it dry in between the layers of paint

After about 5/6 layers of paint the owl will be completely white.

Make the beak, claws black and add some details on the chest and the wings.

Mix some orange paint with yellow paint until you get a light orangey color. Paint the eyes with the orange paint.

Add about 3/4 layers of orange paint. Make with black paint the pupils (2/3 layers). Add some detail with white paint.

Now Hedwig is done!

Have fun making Hedwig!
