House themed earrings

The things you'll need are:

Something to work on like a cutting board

2 popsicle sticks

A piece of paper

Polymer clay

an exacto knife

earrings

something to roll out your clay with

(super glue)

Color combinations for each of the houses:

Hufflepuff = yellow + black polymer clay.

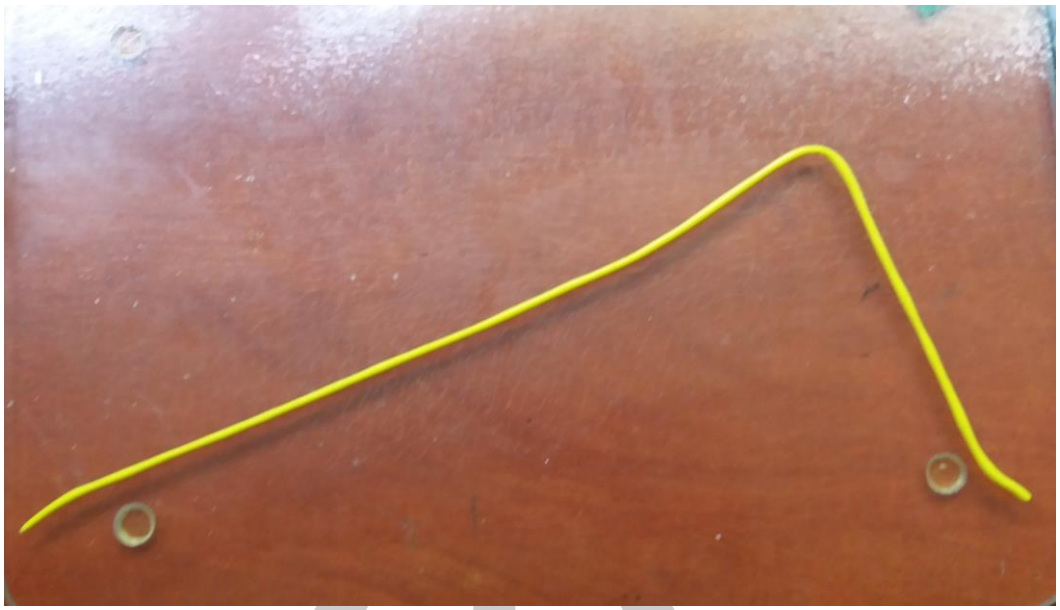
Slytherin = dark green + grey polymer clay.

Ravenclaw = dark blue + grey polymer clay.

Gryffindor = red + yellow polymer clay.

Earrings to make your own jewelry you can find at a craft store or online (amazon).

Grab one of the colors of your house (it’s the best if you do the lightest color first) and roll in out into a thin snake.



When you’ve rolled out both of your colors cut them up in small pieces about 3 or 4 cm long. Then combine them like in the picture below. The more you add of each color the bigger your sheet will get.

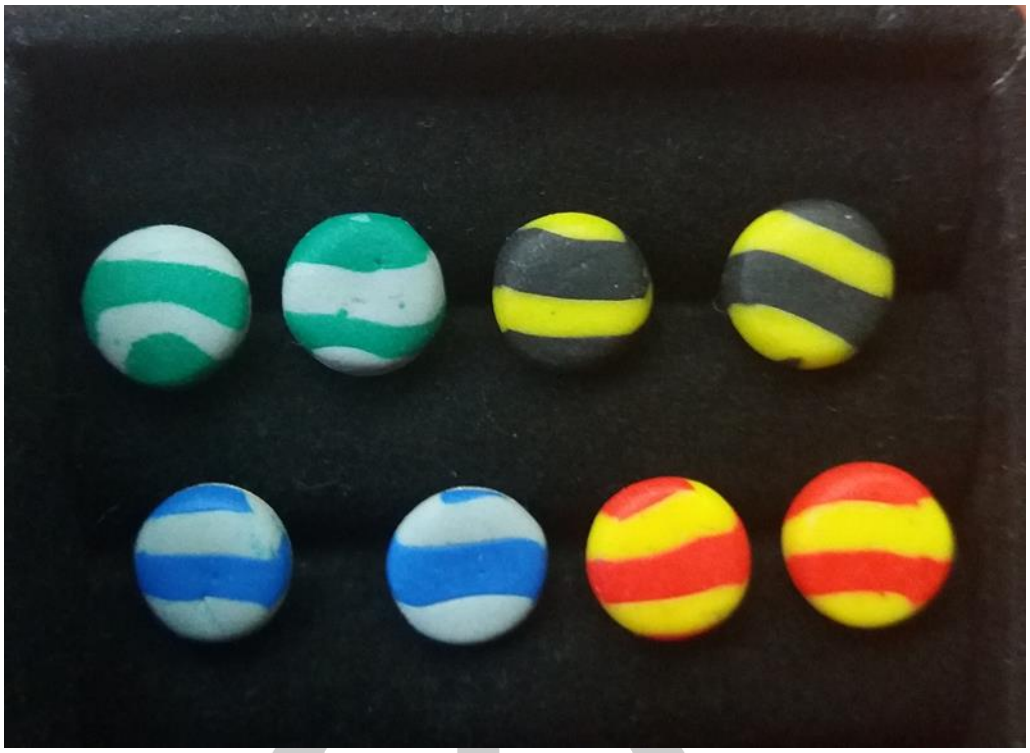
Grab your 2 popsicle sticks and lay one down at each side of your clay. Roll out your clay between the sticks this will make sure that your sheet of clay will have the same thickness everywhere.

When you've rolled out your clay grab your earrings and your exacto knife. Place the earring down on the clay and cut along it with your knife. When you lift up the earring the clay will stick to the earring now you can shape it until your happy. As you can see out of a small sheet you can get a lot of earrings.

When you are happy with how your earrings look place them on a piece of baking paper or thin foil and bake them in the oven (follow the instructions of your polymer clay)

Warning: before you put them in the oven check if you removed the back of the earrings these are plastic and will probably melt in the oven!

When they have cooled down you can put the earring backs back on and they are done!



And now your house themed earrings are done!

Have fun making these earrings ring!!
