

Magical Agenda

The thing you'll need are:

A cutting mat

a ruler

scissors

An exacto knife

black paper

glue

Photo's (you can use your own but I left the ones I used on the website)

front cover

an agenda (I got mine from the HEMA which has pouches to put photos in and on the front also a pouch to put a photo in)

My agenda has 5 pouches in the agenda and one on the front. I cut out one which has a length of 15 cm and a width of 10 cm this one is for the front. The other 5 had a length of 17 cm and a width of 11,5 cm.

Glue down the front picture onto the black paper that you cut out for the front. The picture and the black paper have the same measurements so it should fit perfectly. When your done place it in your agenda.

Cut out all of the pictures for inside of the agenda. I made mine 15 cm long and 10 cm width so it will leave a little of the black paper around the corners.

Glue down one of the pictures on the front of the black paper and one on the back. Repeat this with the other 4 piece of black paper and 8 pictures. When your done place them all into your agenda.

And now your magical Agenda is done!!

I hope you have fun making this Agenda!!!

And have magical school year <3
