

Puzzles

The things you'll need are:

Wooden craft cubes

Acrylic paint in the colors you need

Masking tape

A pencil

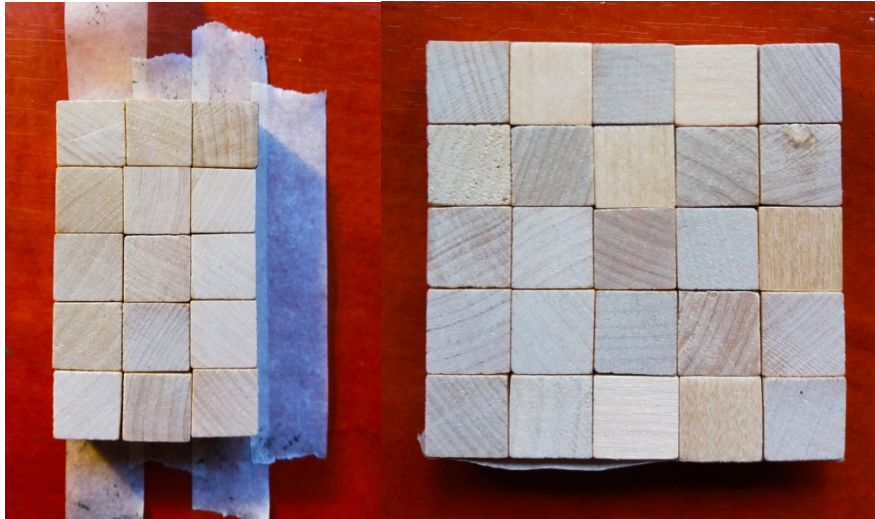

Paint brushes

Pictures you want to use for you puzzles

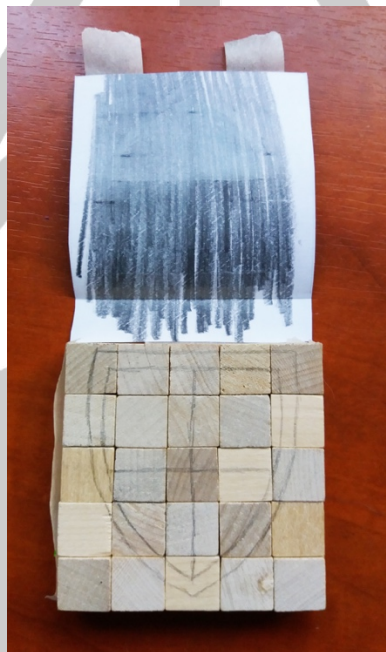

Something to put you paint on

Water to clean your brushes

Take your wooden cubes and your masking tape. take five piece of tape and piece them together (like in the picture) place a row of 5 cubes on the first piece of tape and repeat this step until you end up with 5 rows of 5 cubes (like the second picture). To keep all the cubes in place put some tap all around the square of cubes.

Take one of your squares of wooden cubes and a image you want to trace on it. cover the back of your image with pencil and cut it out in the size of your square but leave about 2 centimeters of paper on the top. Place the image on the square of cubes and fold the extra 2 centimeters of paper over the top side and tape that down to keep it in place (and also put 1 or 2 pieces of tape on the bottom side of the image). Trace over the image on the cubes and carefully take the paper of when you're done.

Now you can start painting!! start with painting the outlines of your image. then move on to the insides of your image and the best is to first do the lightest colors and last the darker colors of your image. And at last paint the background and also don't forget to paint the sides of the cubes that will be visible.

Repeat the last 3 steps as many times to make some very cute and fun puzzles.

And now your puzzles are done!!
I hope you have fun making these puzzles!!!

(p.s i think these will make cute gifts for a young potterhead)
