

Harry Potter Badges

This DIY is fun to make and makes a perfect decoration for your bag or jacket.

The supplies you'll need are:

Clear shrink plastic

hot glue gun

Blue, yellow, red, green, silver and gold acrylic paint

hot glue stick

Paint brushes

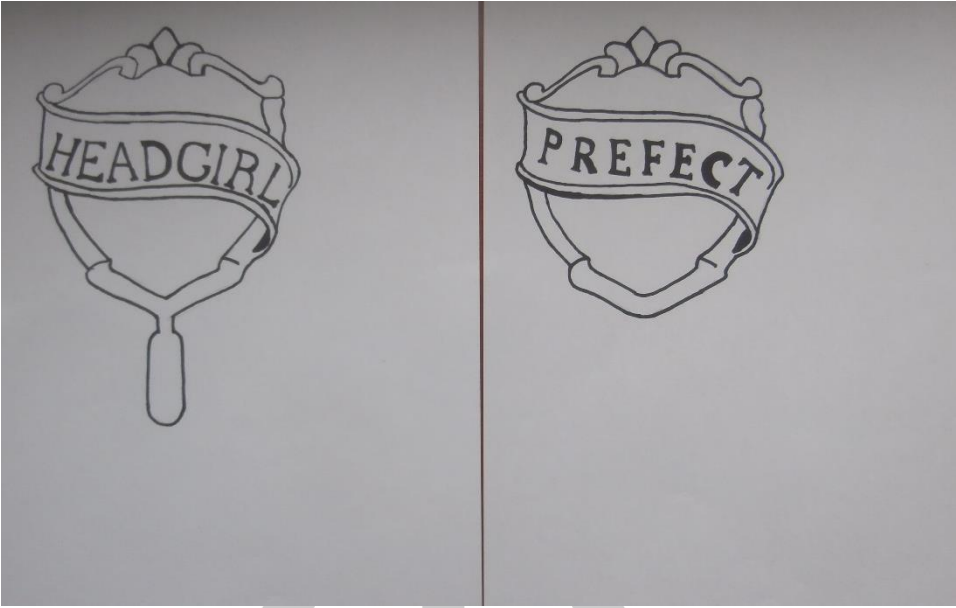

templates

Black permanent marker

scissors

Brooch pins

First you want to pick the design(s) you want to make. The templates that I made you can find on the blog.

Grab your shrink plastic tape it over your design and start tracing the design with your black permanent marker.

After you've traced your design check if you didn't miss anything and cut them out.

After you've cut them out follow the instructions of your shrink plastic and let them shrink.

The color combinations for each house are:

Slytherin: green-silver

Hufflepuff: yellow-gold

Gryffindor: red-gold

Ravenclaw: blue-silver

After they've cooled down paint them in the house you're in or the house you like. Start with the silver/gold and then paint the color of the house. Add as much layers of paint until your satisfied with the look of it.

After the paint is dry add an brooch pin with your hot glue gun.

And now your badges are done! You can find the templates that I made on my blog.

Have fun making these pins!

(TIP: to secure the paint on the badges you can add a layer of mod podge or any kind of topcoat/sealer before you add the brooch pin)
