

# DIY Characters Pins

The supplies you'll need are:

Shrink plastic

Red, yellow, black, white, green, pink, brown acrylic paint

Paint brushes

Pin backs

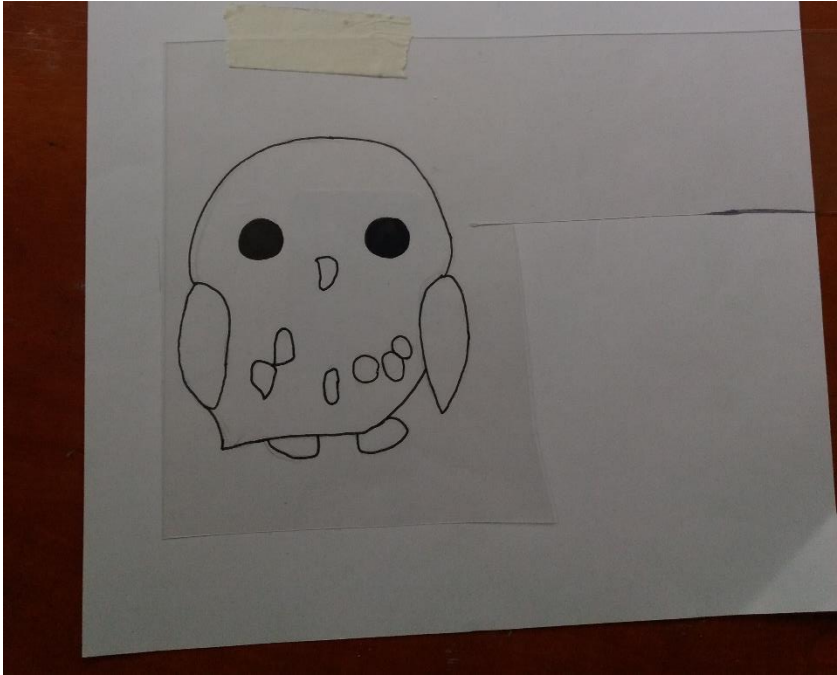

black permanent marker

scissors

hot glue gun + glue sticks

template

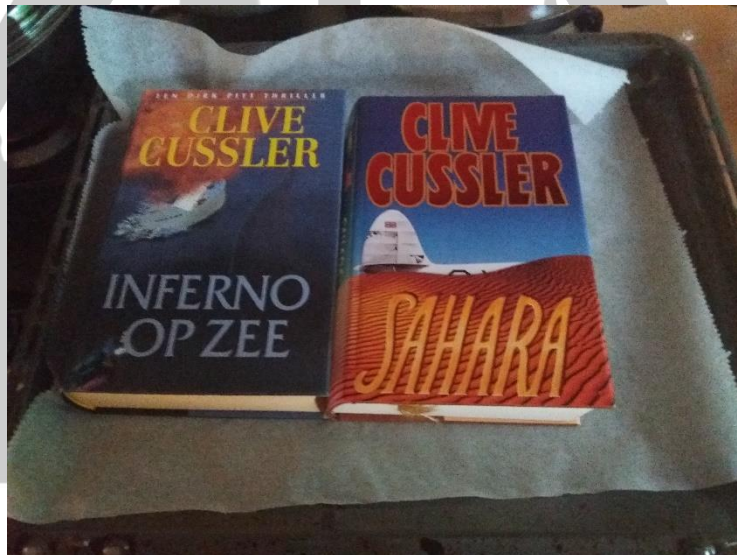

Choose the characters you want to make a pin of and grab a piece of shrink plastic and trace the design on the shrink plastic with the black permanent marker.

When you've traced all the characters that you want cut them out. When you've cut them out place them on a baking tray with baking paper and follow the instructions on your shrink plastic to let them shrink.

To make them flat place some heavy books on them after they get out of the oven.

After they've cooled down you can start painting them. Start with the smaller part such as the scarf, hands, eyebrows, etc.

To make Draco's hair color and Dobby's clothes color mix a tiny bit of yellow with some white.

To make Ron's hair color mix some yellow and red but use a little more red to get a darker orange.

To make Hermione's hair color mix some yellow with some brown and some with if the color is too dark until you get like a mustardy color.

To make the skin color for Dobby mix white with some pink until you get a light pinkish color and to make the color for his ears mix some of his skin color with a little bit more pink.

And to make the skin color for the others use some of Dobby's skin color and mix it with a little bit of brown until you get the skin color you like.

When your done with painting let them dry completely.

To secure the paint so it won't scrape of that easily add a layer of some sort of sealer I used mod podge.

When the sealer is dry grab your hot glue gun and add the pin backs to the figures.

And now your character pins are done!

Have fun making these pins!
