

Harry potter coasters

These coasters are a fun gift or a great room decoration

DIY - Harry Potter

The supplies you'll need are:

Cork (about 4mm thick)

Pencil or a pen

Clear tape

mod podge

a sponge or sponge brush

scissors

exacto knife

coaster pictures

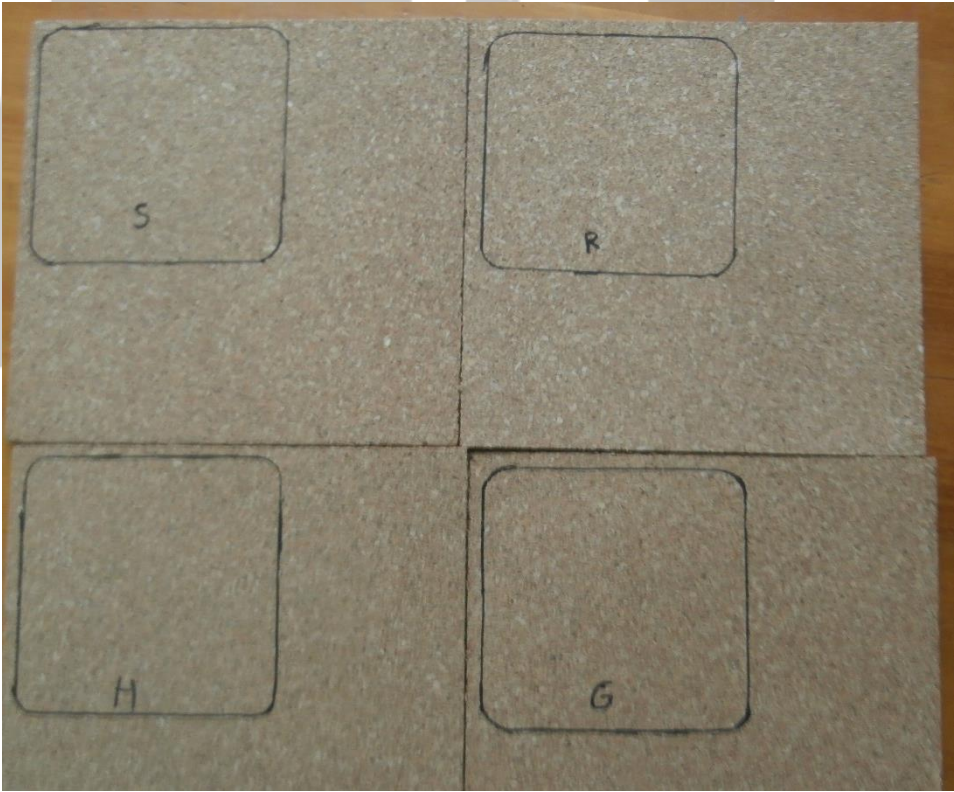

(ruler)

DIY - Harry Potter

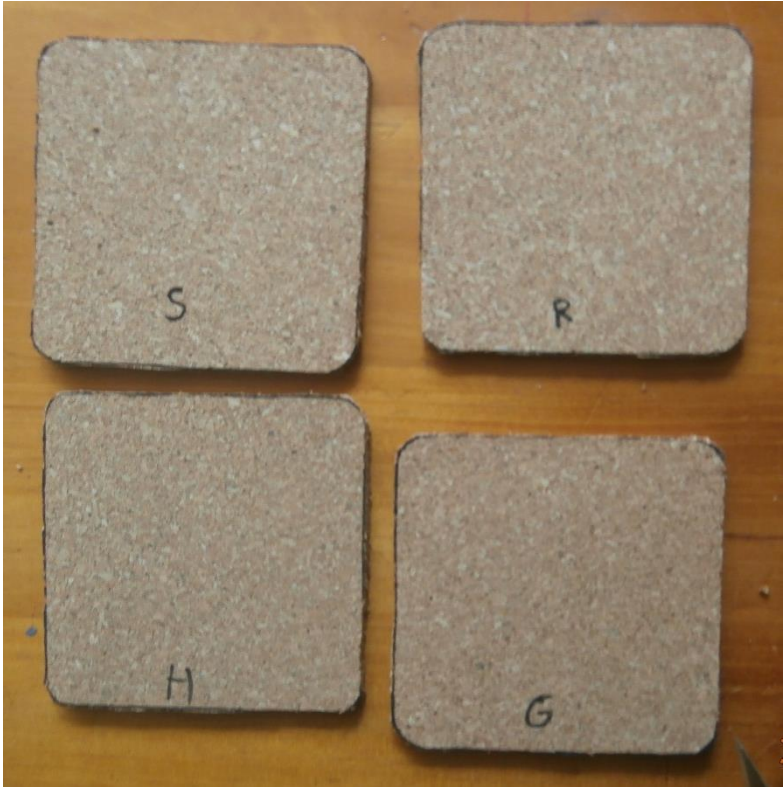

So first you want to cut out your pictures. You can use whatever picture you want for this. The pictures that I used you can find on the blog.

Take your pictures and trace them on the cork.

Cut them out with your exacto knife.

The ink of my pictures leaks out very easily when I applied a coat of mod podge on them so I decided to put on clear tape on the top. If your ink doesn't leak out easily you can skip this step.

Now you want to take your coaster and apply a layer of glue on it with your sponge brush.

If you don't have a sponge brush use a kitchen sponge. Just rip of the hard part of the sponge and cut it in pieces.

DIY - Harry Potter

Let them dry for about 1 hour. If you didn't add the clear tape on it you can apply a few thin coats of mod podge on the pictures. Let them dry between the coats of glue.

Now all your coasters are done! You can find the pictures that I used on the blog

Have fun making these coasters!
